To Whom It May Concern:

**SUBJECT: Infratech Services Inc.'s Performance on Zoom Camera Assessment of City of Cornwall Wastewater Collection System**

---

Infratech Sewer & Water Services Inc. was mandated by the Corporation of City of Cornwall, Ontario to carry out zoom camera assessment of a portion of the City's wastewater collection system. The sewer zoom camera inspection work was performed during a 2007 assignment over approximately 20% of the City's network to prepare an assessment database and a zoom camera inspection and assessment report.

Under the direction of Mr. Don Gunn, C.E.T., the project was well-managed to provide technical evaluation and compilation reporting of the inspection detailing condition and potential for blockage grades and classifying all sewer sections and manholes inspected in accordance with Water Research Centre (WRC) standards and with Manual of Sewer Condition Classification (MSCC) using operators and field inspectors with current North American Association of Pipeline Inspectors (NAPPI) certification.

The support staff working for Mr. Gunn also converted some of the relatively recent VHS tapes, on previous CCTV inspection assignments done by others during the period 2000 to 2005 inclusive, to CD or DVD medium in a format compatible with the City's GIS.

Infratech Services' team performed this \$130,000 assignment successfully meeting the stipulated deadlines. The City of Cornwall was satisfied and pleased with the work undertaken by Infratech Services on this assignment.

Sincerely yours,

Jean L. Lemire, P.Eng.  
Approvals & Construction Engineer
